

CHESS99 BOOK 3 | ELO 700-1000 | SILVER

Beginner Tactics

Forks, pins, skewers, mate threats, and the first tactical pattern library.

Contents

1. Forks 28 min
2. Pins 28 min
3. Skewers 28 min
4. Discovered Attacks 28 min
5. Back-Rank Mate 28 min
6. Removing The Defender 28 min
7. Deflection 28 min
8. Decoy 28 min
9. Mate In One And Mate In Two 28 min
10. Mixed Beginner Tactics Test 28 min

Forks

Beginner Tactics | 700-1000 | free

Forks converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for forks.
- Choose a move or plan that fits forks.
- Avoid the common beginner error connected with forks.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Forks is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Training Diagram: review position

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e1** to **e7**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Forks Check 1

What should you do first in a position about **forks**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Forks Check 2

Which answer best matches the chapter habit for **forks**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Forks Check 3

What is the biggest danger if you ignore **forks**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Pins

Beginner Tactics | 700-1000 | silver

Pins converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for pins.
- Choose a move or plan that fits pins.
- Avoid the common beginner error connected with pins.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Pins is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Training Diagram: review position

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **c1** to **c8**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Pins Check 1

What should you do first in a position about **pins**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Pins Check 2

Which answer best matches the chapter habit for **pins**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Pins Check 3

What is the biggest danger if you ignore **pins**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Skewers

Beginner Tactics | 700-1000 | silver

Skewers converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for skewers.
- Choose a move or plan that fits skewers.
- Avoid the common beginner error connected with skewers.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Skewers is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Training Diagram: review position

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **c4** to **f7**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Skewers Check 1

What should you do first in a position about **skewers**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Skewers Check 2

Which answer best matches the chapter habit for **skewers**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Skewers Check 3

What is the biggest danger if you ignore **skewers**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Discovered Attacks

Beginner Tactics | 700-1000 | silver

Discovered Attacks converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for discovered attacks.
- Choose a move or plan that fits discovered attacks.
- Avoid the common beginner error connected with discovered attacks.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Discovered Attacks is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Training Diagram: best practical choice

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: review position

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e1** to **g1**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Back-Rank Mate Check 1

What should you do first in a position about **back-rank mate**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Back-Rank Mate Check 2

Which answer best matches the chapter habit for **back-rank mate**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Back-Rank Mate Check 3

What is the biggest danger if you ignore **back-rank mate**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Removing The Defender

Beginner Tactics | 700-1000 | silver

Removing The Defender converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for removing the defender.
- Choose a move or plan that fits removing the defender.
- Avoid the common beginner error connected with removing the defender.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Removing The Defender is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Training Diagram: candidate move
