

CHESS99 BOOK 5 | ELO 1100-1400 | SILVER

Calculation I - Candidate Moves

A repeatable process for choosing moves instead of guessing.

Contents

1. Candidate Moves 28 min
2. Forcing Moves First 28 min
3. Checks 28 min
4. Captures 28 min
5. Threats 28 min
6. Opponent Best Reply 28 min
7. One Move Deeper 28 min
8. When To Stop Calculating 28 min
9. Avoiding Hope Chess 28 min
10. Calculation Checkpoint 28 min

Candidate Moves

Calculation I - Candidate Moves | 1100-1400 | silver

Candidate Moves converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for candidate moves.
- Choose a move or plan that fits candidate moves.
- Avoid the common beginner error connected with candidate moves.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Candidate Moves is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: review position

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e1** to **g1**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Candidate Moves Check 1

What should you do first in a position about **candidate moves**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Candidate Moves Check 2

Which answer best matches the chapter habit for **candidate moves**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Candidate Moves Check 3

What is the biggest danger if you ignore **candidate moves**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Forcing Moves First

Calculation I - Candidate Moves | 1100-1400 | silver

Forcing Moves First converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for forcing moves first.
- Choose a move or plan that fits forcing moves first.
- Avoid the common beginner error connected with forcing moves first.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Forcing Moves First is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: review position

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **c4** to **f7**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Forcing Moves First Check 1

What should you do first in a position about **forcing moves first**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Forcing Moves First Check 2

Which answer best matches the chapter habit for **forcing moves first**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Forcing Moves First Check 3

What is the biggest danger if you ignore **forcing moves first**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Checks

Calculation I - Candidate Moves | 1100-1400 | silver

Checks converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for checks.
- Choose a move or plan that fits checks.
- Avoid the common beginner error connected with checks.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Checks is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: comparison position

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Training Diagram: review position

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **a1** to **a8**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Checks Check 1

What should you do first in a position about **checks**?

- a. Name the key signal before choosing a move.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Checks Check 2

Which answer best matches the chapter habit for **checks**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Checks Check 3

What is the biggest danger if you ignore **checks**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Captures

Calculation I - Candidate Moves | 1100-1400 | silver

Captures converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for captures.
- Choose a move or plan that fits captures.
- Avoid the common beginner error connected with captures.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Captures is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: review position

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e2** to **e4**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Captures Check 1

What should you do first in a position about **captures**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Captures Check 2

Which answer best matches the chapter habit for **captures**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Captures Check 3

What is the biggest danger if you ignore **captures**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Threats

Calculation I - Candidate Moves | 1100-1400 | silver

Threats converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for threats.
- Choose a move or plan that fits threats.
- Avoid the common beginner error connected with threats.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Threats is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: review position

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e2** to **e3**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Threats Check 1

What should you do first in a position about **threats**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Threats Check 2

Which answer best matches the chapter habit for **threats**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Threats Check 3

What is the biggest danger if you ignore **threats**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Opponent Best Reply

Calculation I - Candidate Moves | 1100-1400 | silver

Opponent Best Reply converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for opponent best reply.
- Choose a move or plan that fits opponent best reply.
- Avoid the common beginner error connected with opponent best reply.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Opponent Best Reply is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Training Diagram: review position

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **b3** to **c5**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Opponent Best Reply Check 1

What should you do first in a position about **opponent best reply**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Opponent Best Reply Check 2

Which answer best matches the chapter habit for **opponent best reply**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Opponent Best Reply Check 3

What is the biggest danger if you ignore **opponent best reply**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

One Move Deeper

Calculation I - Candidate Moves | 1100-1400 | silver

One Move Deeper converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for one move deeper.
- Choose a move or plan that fits one move deeper.
- Avoid the common beginner error connected with one move deeper.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

One Move Deeper is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

One Move Deeper Check 1

What should you do first in a position about **one move deeper**?

- a. Name the key signal before choosing a move.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

One Move Deeper Check 2

Which answer best matches the chapter habit for **one move deeper**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

One Move Deeper Check 3

What is the biggest danger if you ignore **one move deeper**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

When To Stop Calculating

Calculation I - Candidate Moves | 1100-1400 | silver

When To Stop Calculating converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for when to stop calculating.
- Choose a move or plan that fits when to stop calculating.
- Avoid the common beginner error connected with when to stop calculating.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

When To Stop Calculating is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

When To Stop Calculating Check 1

What should you do first in a position about **when to stop calculating**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

When To Stop Calculating Check 2

Which answer best matches the chapter habit for **when to stop calculating**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

When To Stop Calculating Check 3

What is the biggest danger if you ignore **when to stop calculating**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Avoiding Hope Chess

Calculation I - Candidate Moves | 1100-1400 | silver

Avoiding Hope Chess converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for avoiding hope chess.
- Choose a move or plan that fits avoiding hope chess.
- Avoid the common beginner error connected with avoiding hope chess.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Avoiding Hope Chess is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.
