

CHESS99 BOOK 10 | ELO 1900-2200 | GOLD

Calculation II - Depth And Quiet Moves

Deep candidate trees, defensive resources, quiet moves, and advanced exams.

Contents

1. Candidate Trees 28 min
2. Defensive Resources 28 min
3. Quiet Moves 28 min
4. Zwischenzug At Depth 28 min
5. Sacrifice Evaluation 28 min
6. Perpetual Check Awareness 28 min
7. Mating Nets 28 min
8. Endgame Tactics 28 min
9. Time-Pressure Calculation 28 min
10. Advanced Calculation Exam 28 min

Candidate Trees

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Candidate Trees converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for candidate trees.
- Choose a move or plan that fits candidate trees.
- Avoid the common beginner error connected with candidate trees.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Candidate Trees is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Training Diagram: review position

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **b3** to **c5**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Candidate Trees Check 1

What should you do first in a position about **candidate trees**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Candidate Trees Check 2

Which answer best matches the chapter habit for **candidate trees**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Candidate Trees Check 3

What is the biggest danger if you ignore **candidate trees**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Defensive Resources

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Defensive Resources converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for defensive resources.
- Choose a move or plan that fits defensive resources.
- Avoid the common beginner error connected with defensive resources.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Defensive Resources is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Training Diagram: review position

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e1** to **e7**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Defensive Resources Check 1

What should you do first in a position about **defensive resources**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Defensive Resources Check 2

Which answer best matches the chapter habit for **defensive resources**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Defensive Resources Check 3

What is the biggest danger if you ignore **defensive resources**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Quiet Moves

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Quiet Moves converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for quiet moves.
- Choose a move or plan that fits quiet moves.
- Avoid the common beginner error connected with quiet moves.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Quiet Moves is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Training Diagram: review position

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **c1** to **c8**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Quiet Moves Check 1

What should you do first in a position about **quiet moves**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Quiet Moves Check 2

Which answer best matches the chapter habit for **quiet moves**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Quiet Moves Check 3

What is the biggest danger if you ignore **quiet moves**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Zwischenzug At Depth

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Zwischenzug At Depth converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for zwischenzug at depth.
- Choose a move or plan that fits zwischenzug at depth.
- Avoid the common beginner error connected with zwischenzug at depth.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Zwischenzug At Depth is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Training Diagram: review position

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **c4** to **f7**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Zwischenzug At Depth Check 1

What should you do first in a position about **zwischenzug at depth**?

- a. Name the key signal before choosing a move.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Zwischenzug At Depth Check 2

Which answer best matches the chapter habit for **zwischenzug at depth**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Zwischenzug At Depth Check 3

What is the biggest danger if you ignore **zwischenzug at depth**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Sacrifice Evaluation

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Sacrifice Evaluation converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for sacrifice evaluation.
- Choose a move or plan that fits sacrifice evaluation.
- Avoid the common beginner error connected with sacrifice evaluation.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Sacrifice Evaluation is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: review position

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **f3** to **d4**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Sacrifice Evaluation Check 1

What should you do first in a position about **sacrifice evaluation**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Sacrifice Evaluation Check 2

Which answer best matches the chapter habit for **sacrifice evaluation**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Sacrifice Evaluation Check 3

What is the biggest danger if you ignore **sacrifice evaluation**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Perpetual Check Awareness

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Perpetual Check Awareness converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for perpetual check awareness.
- Choose a move or plan that fits perpetual check awareness.
- Avoid the common beginner error connected with perpetual check awareness.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Perpetual Check Awareness is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: review position

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e1** to **g1**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Perpetual Check Awareness Check 1

What should you do first in a position about **perpetual check awareness**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Perpetual Check Awareness Check 2

Which answer best matches the chapter habit for **perpetual check awareness**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Perpetual Check Awareness Check 3

What is the biggest danger if you ignore **perpetual check awareness**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Mating Nets

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Mating Nets converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for mating nets.
- Choose a move or plan that fits mating nets.
- Avoid the common beginner error connected with mating nets.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Mating Nets is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Mating Nets Check 2

Which answer best matches the chapter habit for **mating nets**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Mating Nets Check 3

What is the biggest danger if you ignore **mating nets**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Endgame Tactics

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Endgame Tactics converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for endgame tactics.
- Choose a move or plan that fits endgame tactics.
- Avoid the common beginner error connected with endgame tactics.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Endgame Tactics is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **a1** to **a8**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Endgame Tactics Check 1

What should you do first in a position about **endgame tactics**?

- a. Name the key signal before choosing a move.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Endgame Tactics Check 2

Which answer best matches the chapter habit for **endgame tactics**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Endgame Tactics Check 3

What is the biggest danger if you ignore **endgame tactics**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Time-Pressure Calculation

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Time-Pressure Calculation converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for time-pressure calculation.
- Choose a move or plan that fits time-pressure calculation.
- Avoid the common beginner error connected with time-pressure calculation.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Time-Pressure Calculation is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: review position

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e2** to **e4**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Time-Pressure Calculation Check 1

What should you do first in a position about **time-pressure calculation**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Time-Pressure Calculation Check 2

Which answer best matches the chapter habit for **time-pressure calculation**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Time-Pressure Calculation Check 3

What is the biggest danger if you ignore **time-pressure calculation**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Advanced Calculation Exam

Calculation II - Depth And Quiet Moves | 1900-2200 | gold

Advanced Calculation Exam converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for advanced calculation exam.
- Choose a move or plan that fits advanced calculation exam.
- Avoid the common beginner error connected with advanced calculation exam.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Advanced Calculation Exam is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: candidate move
