What Is A Plan

Positional Chess For Club Players | 1500-1800 | silver

What Is A Plan converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for what is a plan.
- Choose a move or plan that fits what is a plan.
- Avoid the common beginner error connected with what is a plan.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

What Is A Plan is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: review position

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e2** to **e3**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

What Is A Plan Check 1

What should you do first in a position about **what is a plan?**

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
