

CHESS99 BOOK 11 | ELO 2000-2300 | GOLD

Repertoire And Model Games

Opening choices connected to middlegame plans and model-game anchors.

Contents

1. Building A Repertoire 28 min
2. Choosing Openings By Style 28 min
3. Model Games As Memory Anchors 28 min
4. Typical Pawn Breaks 28 min
5. Typical Piece Placements 28 min
6. Anti-Sidelines 28 min
7. Transition To Middlegame 28 min
8. Opening Mistakes And Punishments 28 min
9. Repertoire Review Drills 28 min
10. Build Your First Chess99 Repertoire File 28 min

Building A Repertoire

Repertoire And Model Games | 2000-2300 | gold

Building A Repertoire converted into a repeatable Chess99 training habit.

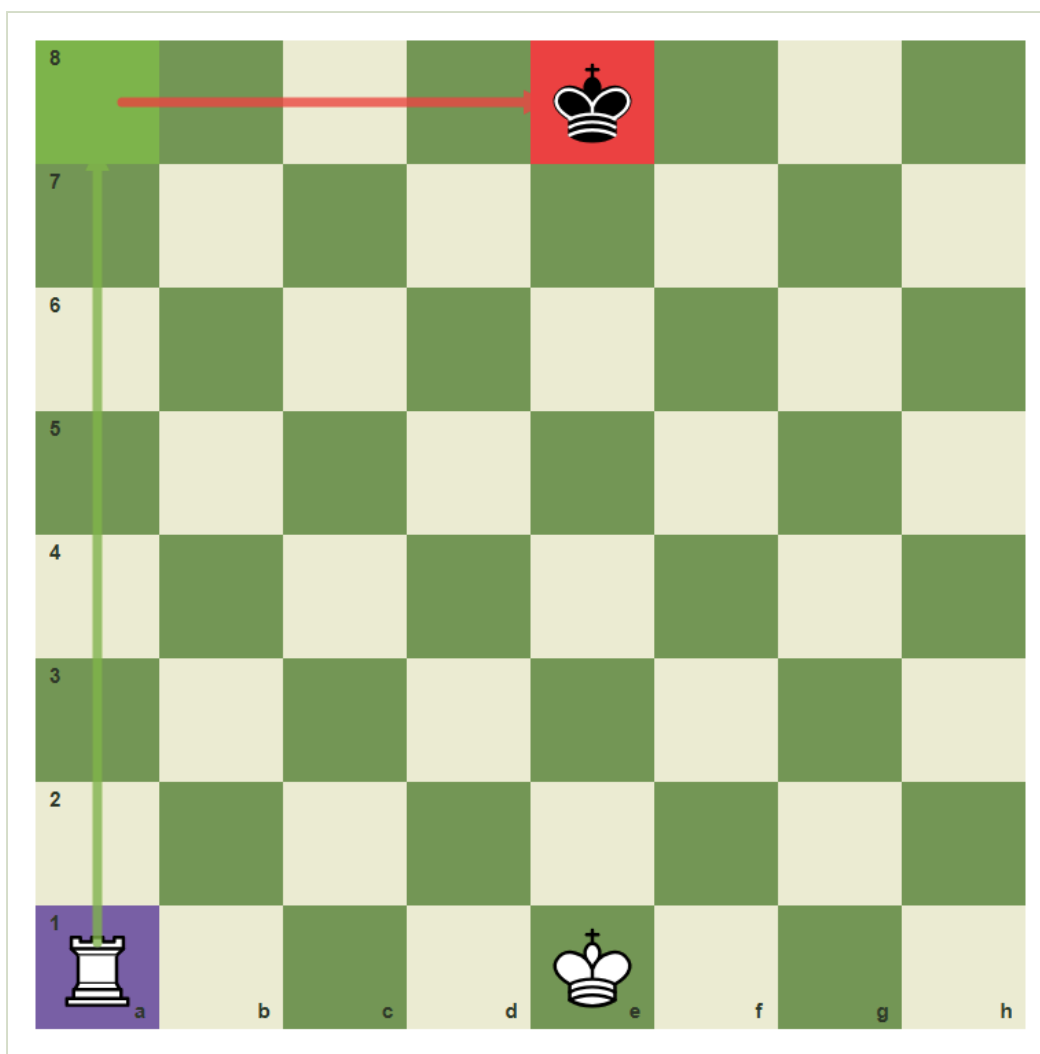

Learning objectives

- Recognize the visual signal for building a repertoire.
- Choose a move or plan that fits building a repertoire.
- Avoid the common beginner error connected with building a repertoire.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

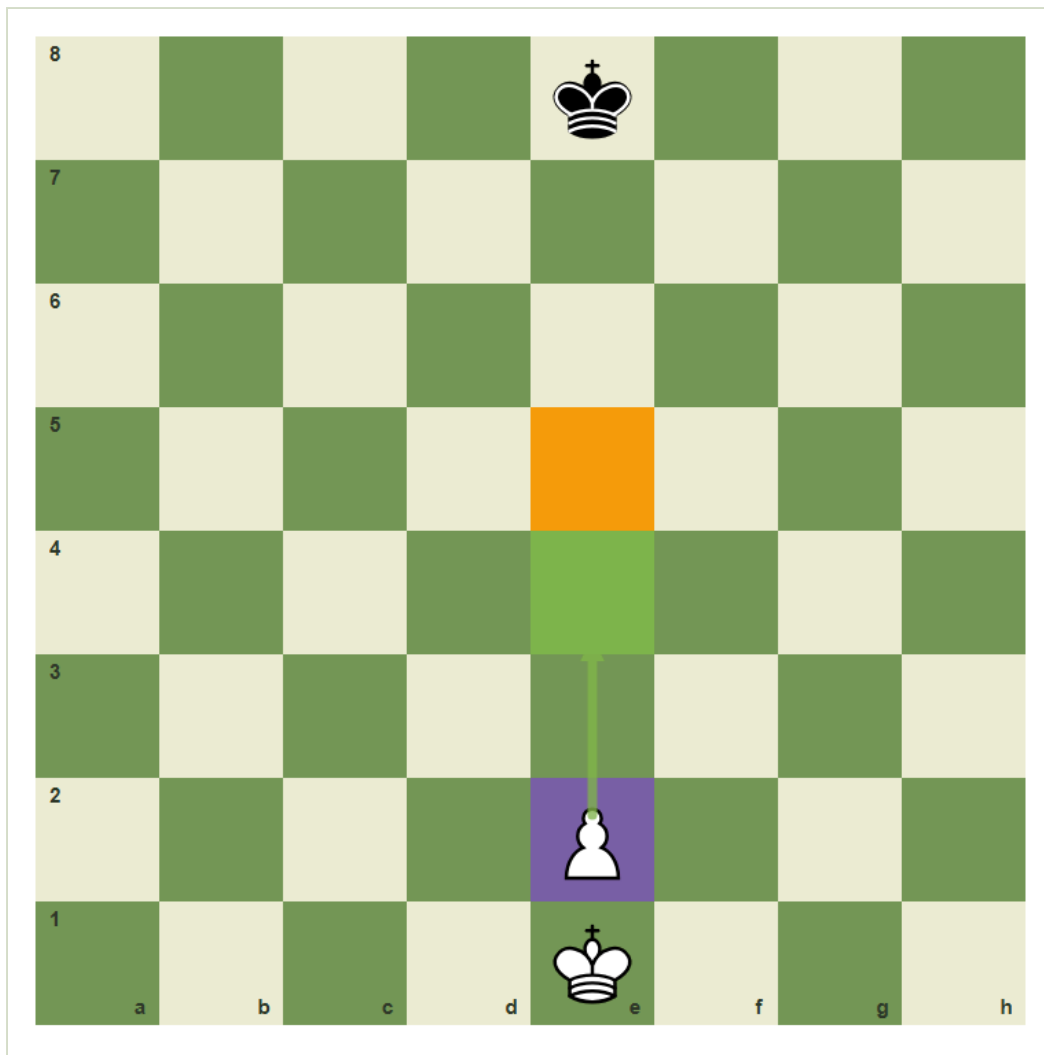

Building A Repertoire is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

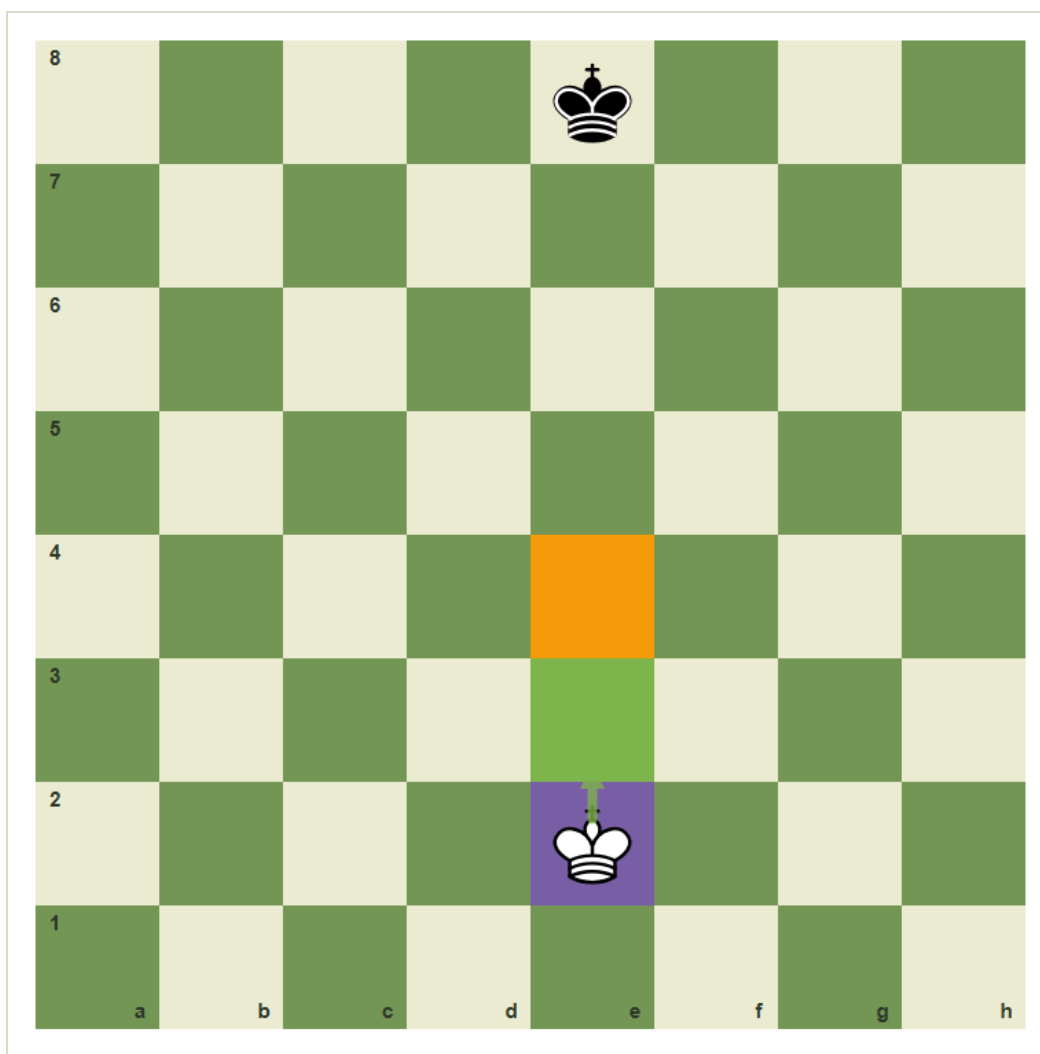

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Analysis And Decision

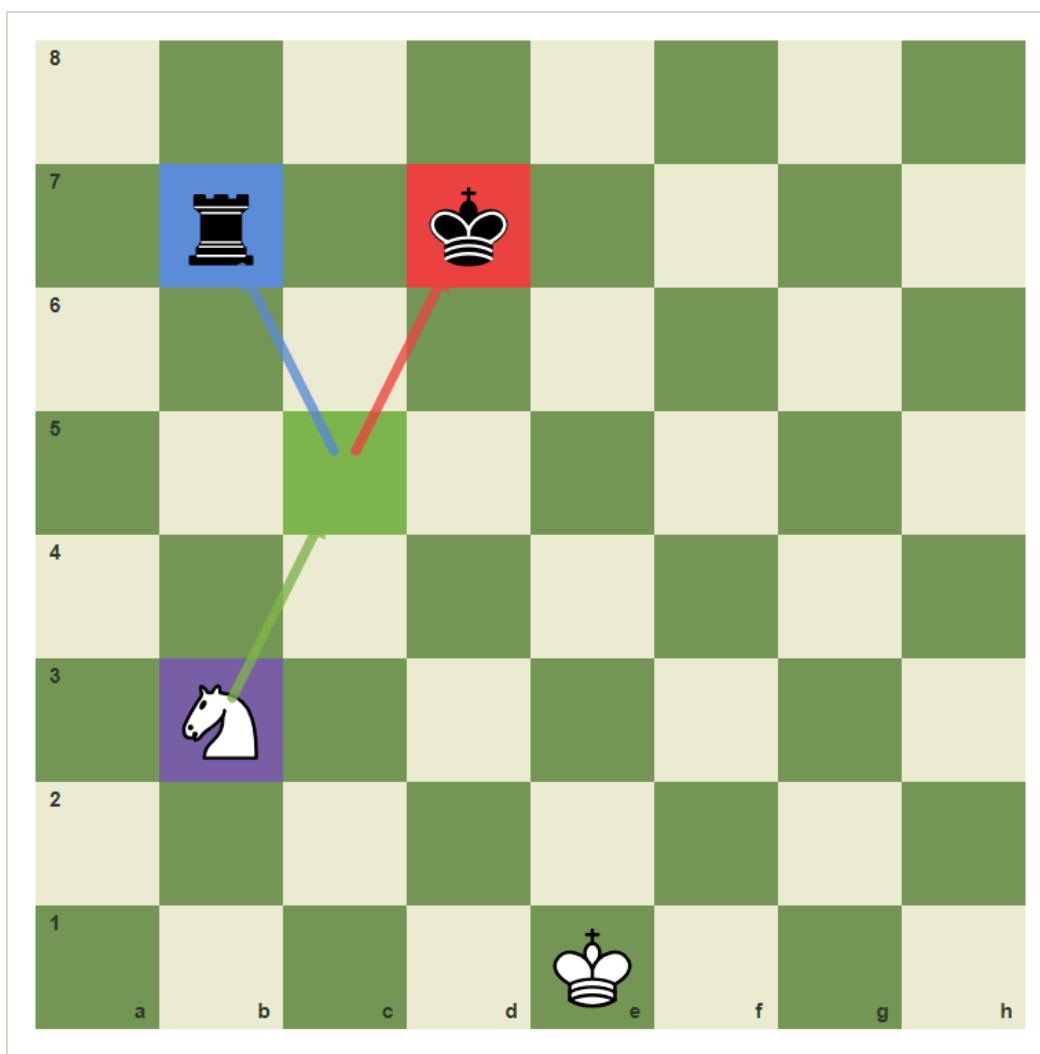

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

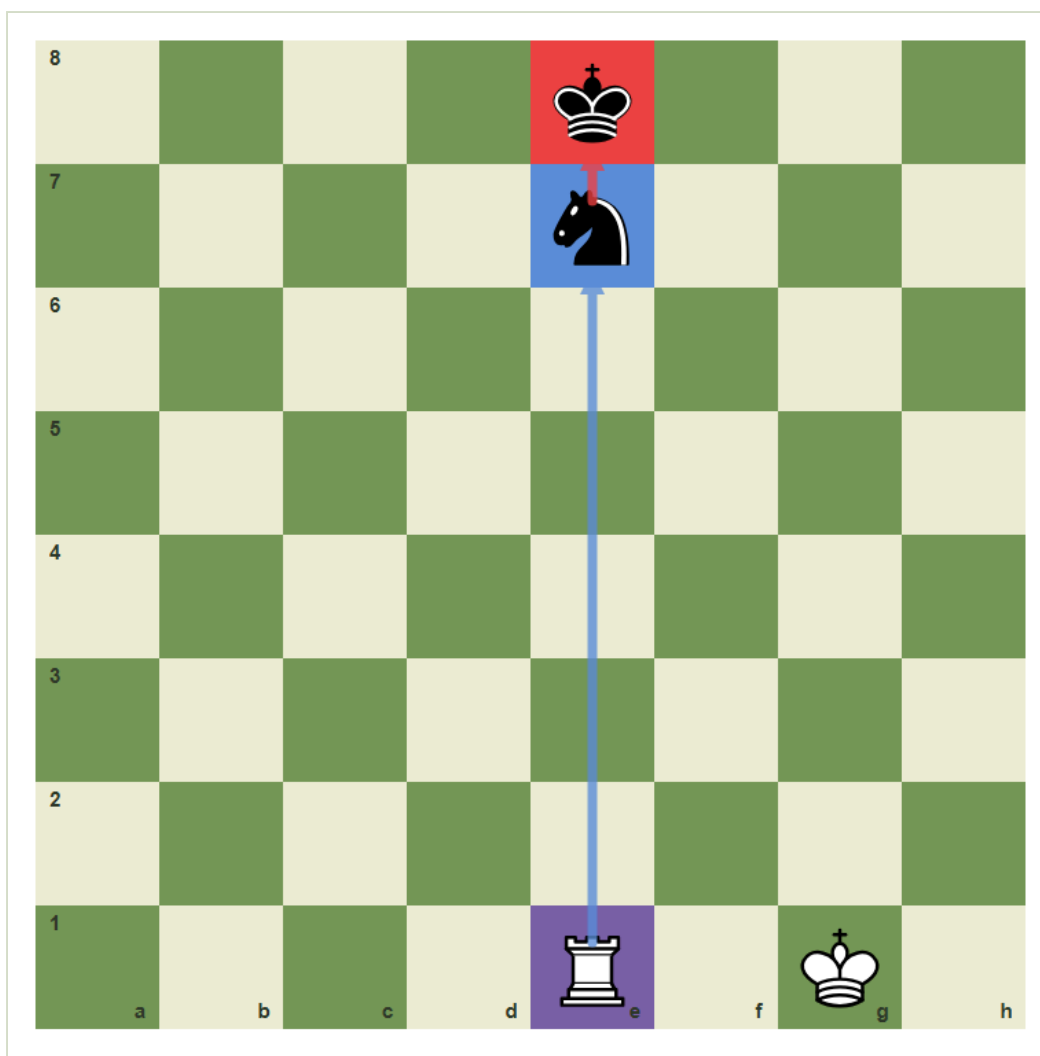

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

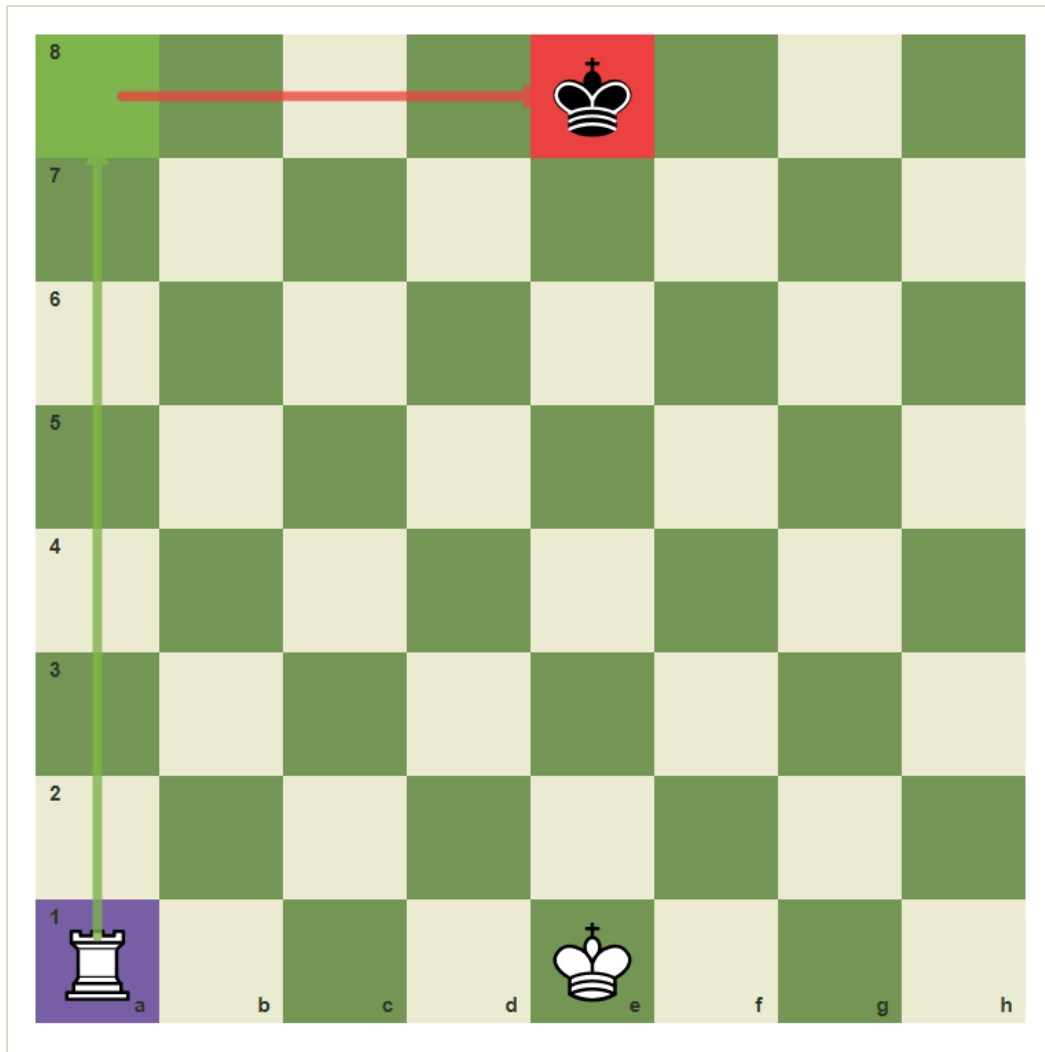

Training Diagram: review position

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

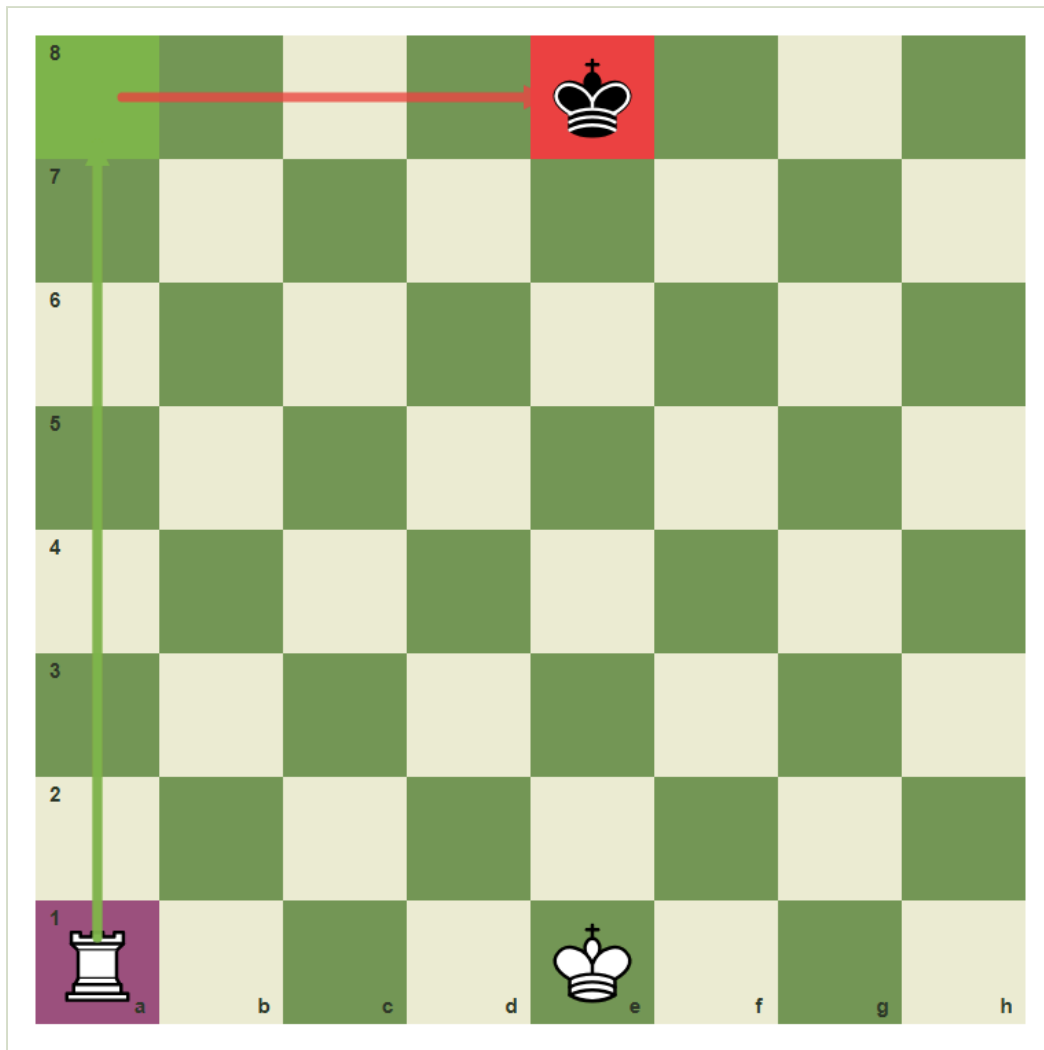

Play the highlighted move from **a1** to **a8**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Building A Repertoire Check 1

What should you do first in a position about **building a repertoire**?

- a. Name the key signal before choosing a move.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Building A Repertoire Check 2

Which answer best matches the chapter habit for **building a repertoire**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Building A Repertoire Check 3

What is the biggest danger if you ignore **building a repertoire**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Choosing Openings By Style

Repertoire And Model Games | 2000-2300 | gold

Choosing Openings By Style converted into a repeatable Chess99 training habit.

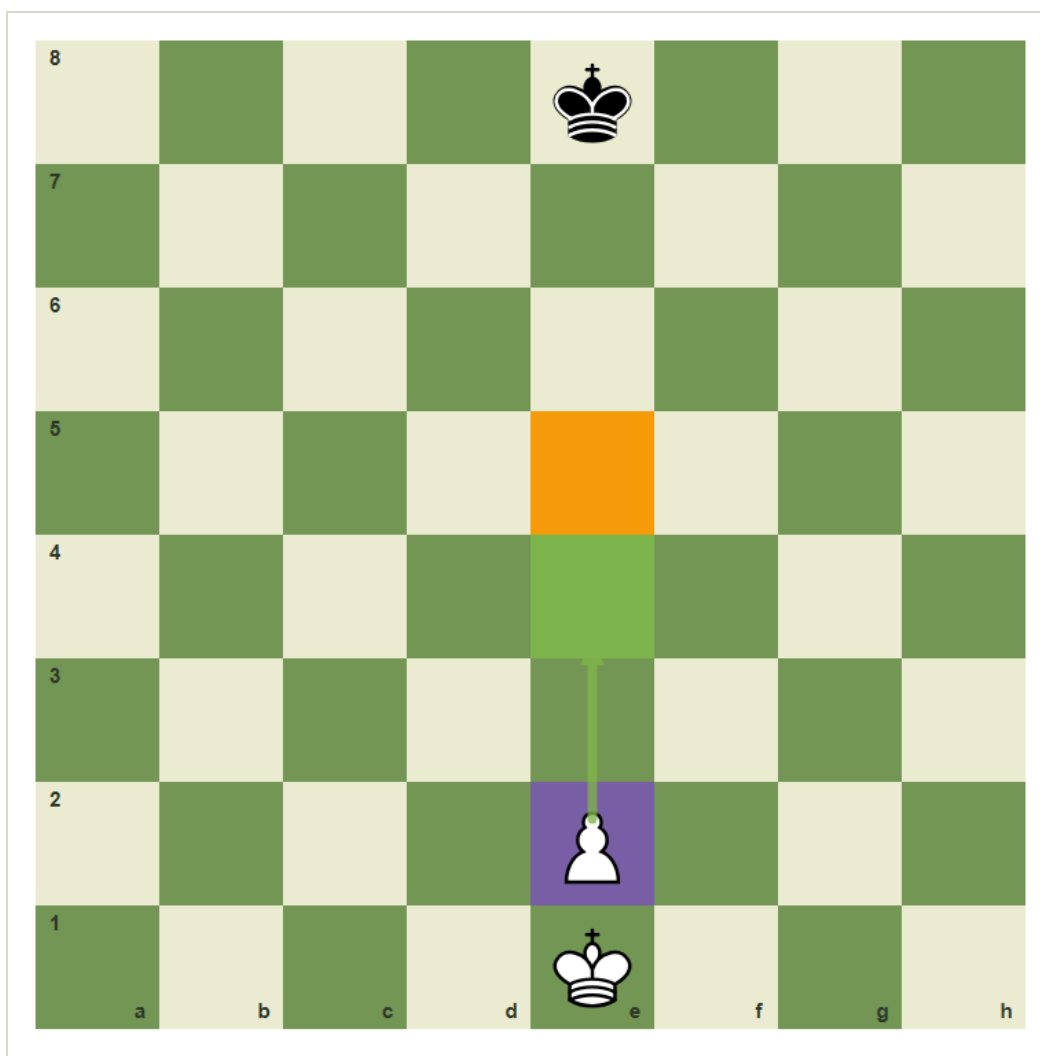

Learning objectives

- Recognize the visual signal for choosing openings by style.
- Choose a move or plan that fits choosing openings by style.
- Avoid the common beginner error connected with choosing openings by style.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

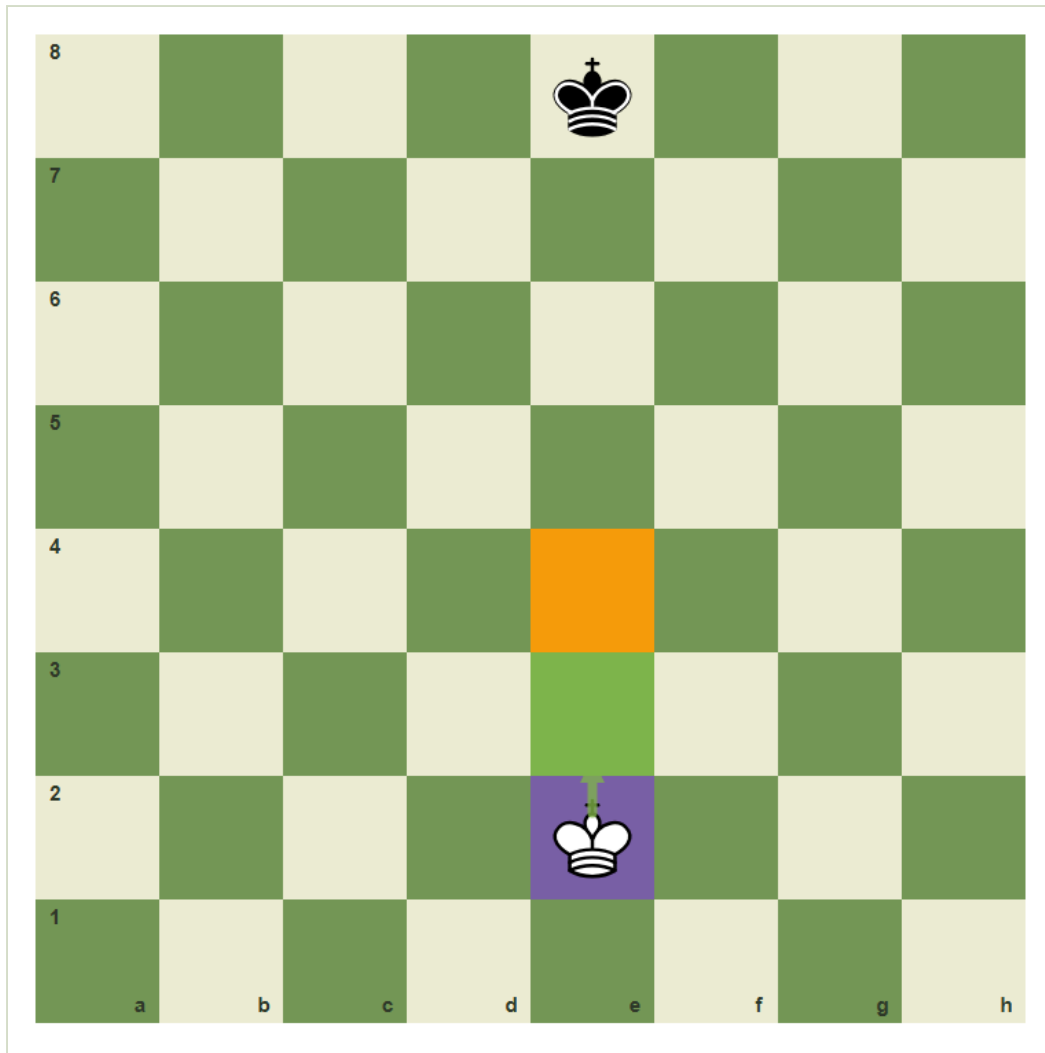

Choosing Openings By Style is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

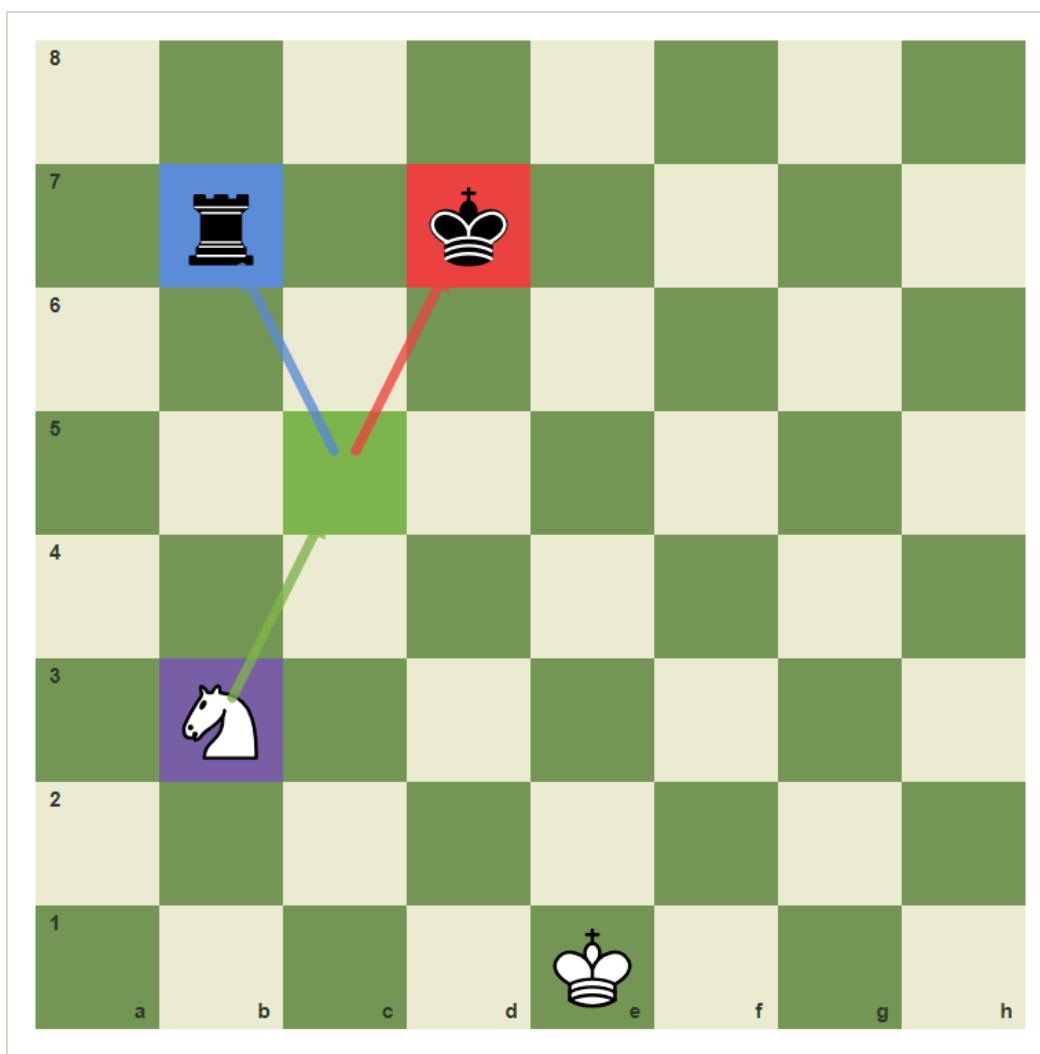

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Analysis And Decision

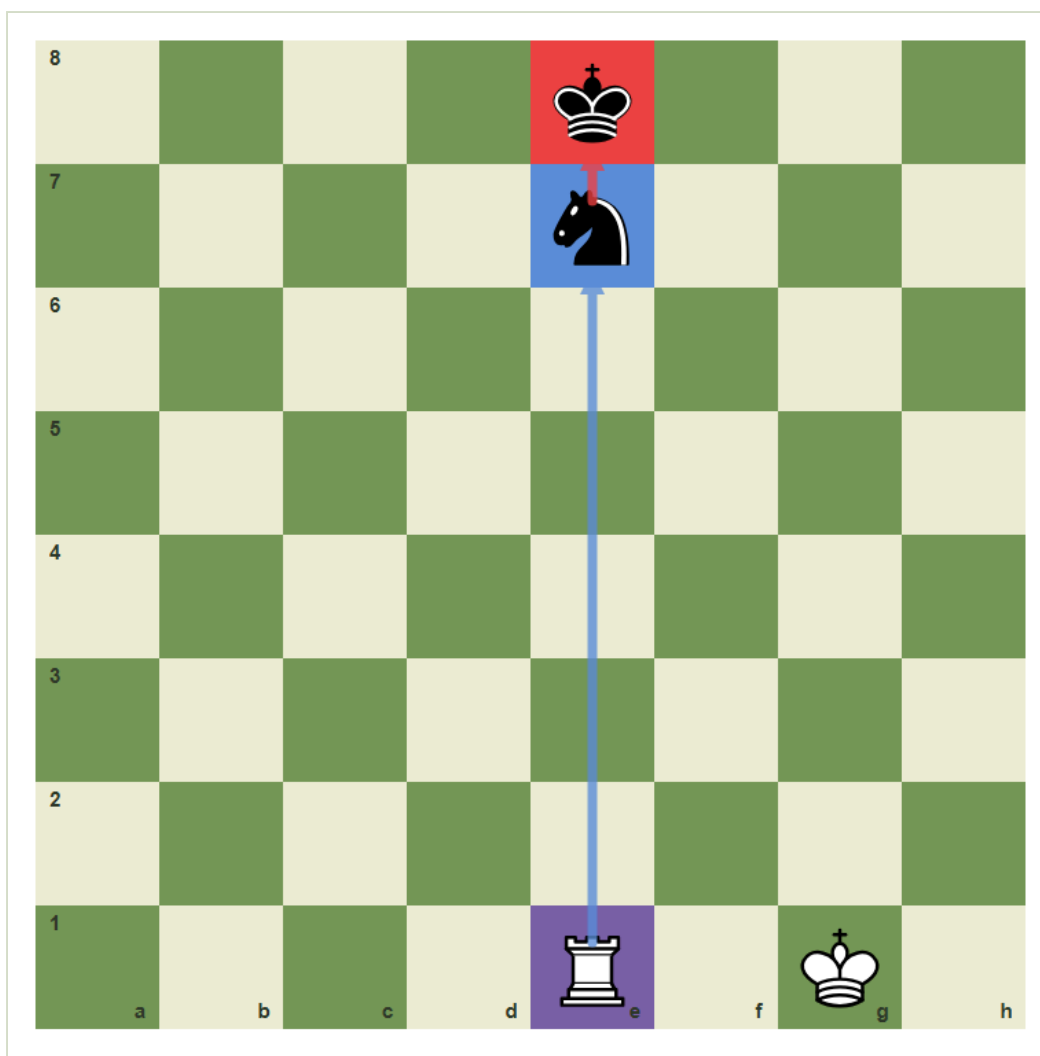

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

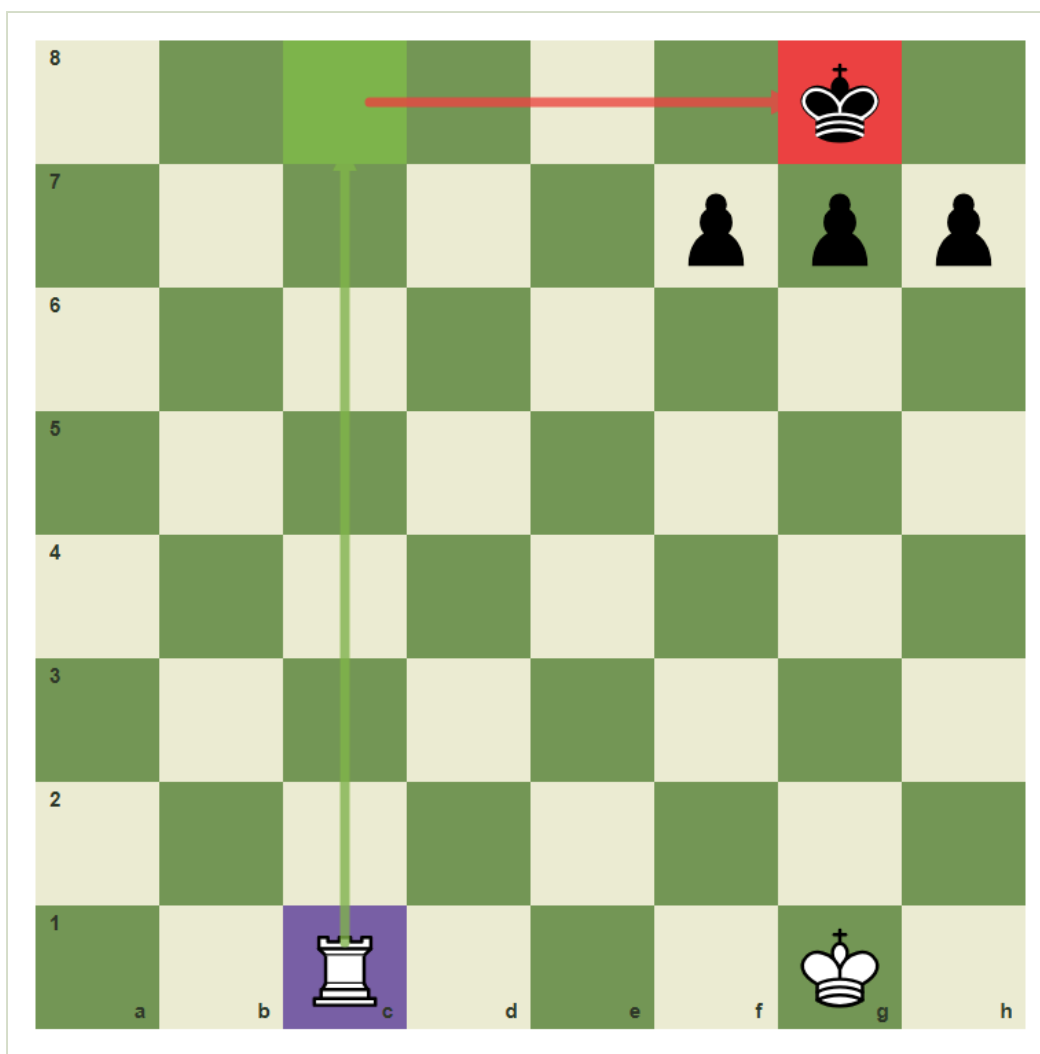

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

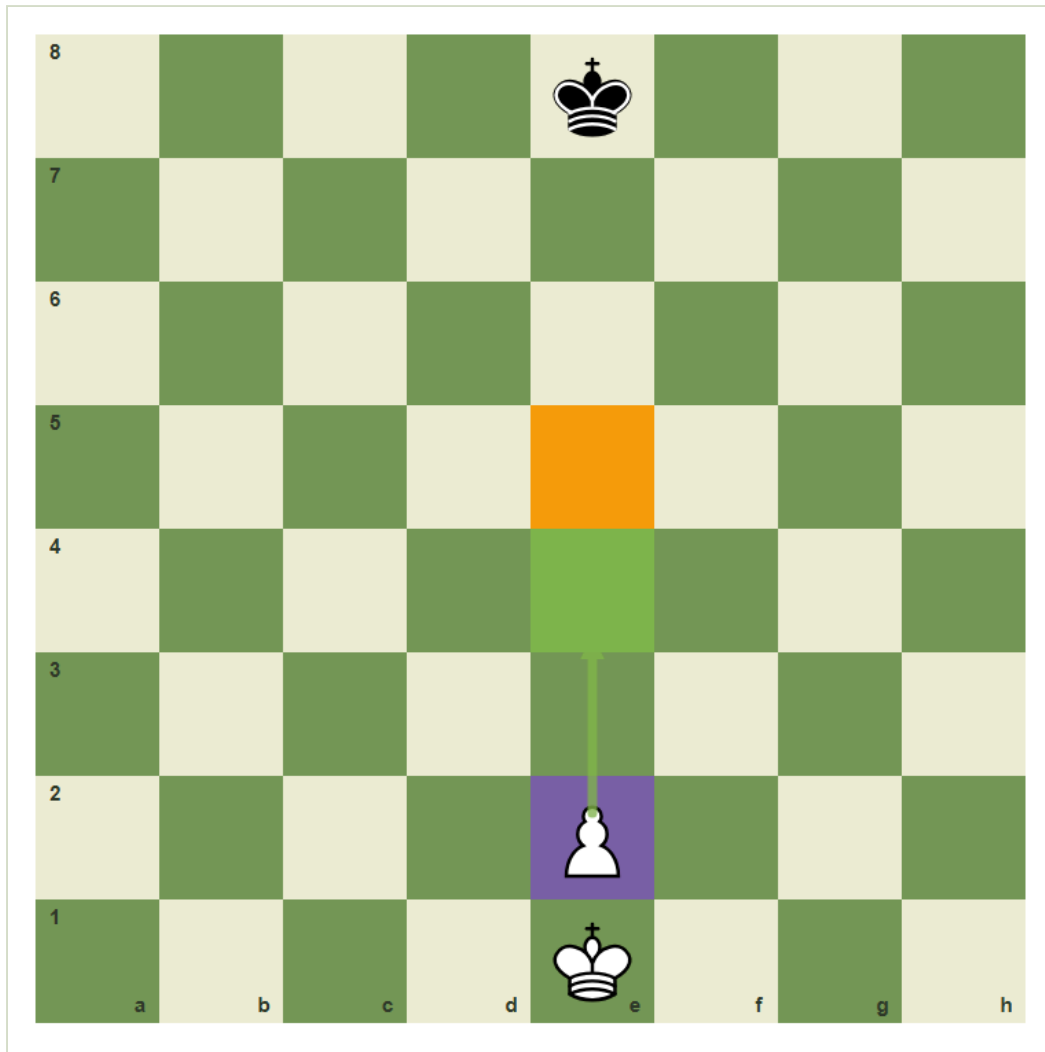

Training Diagram: review position

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

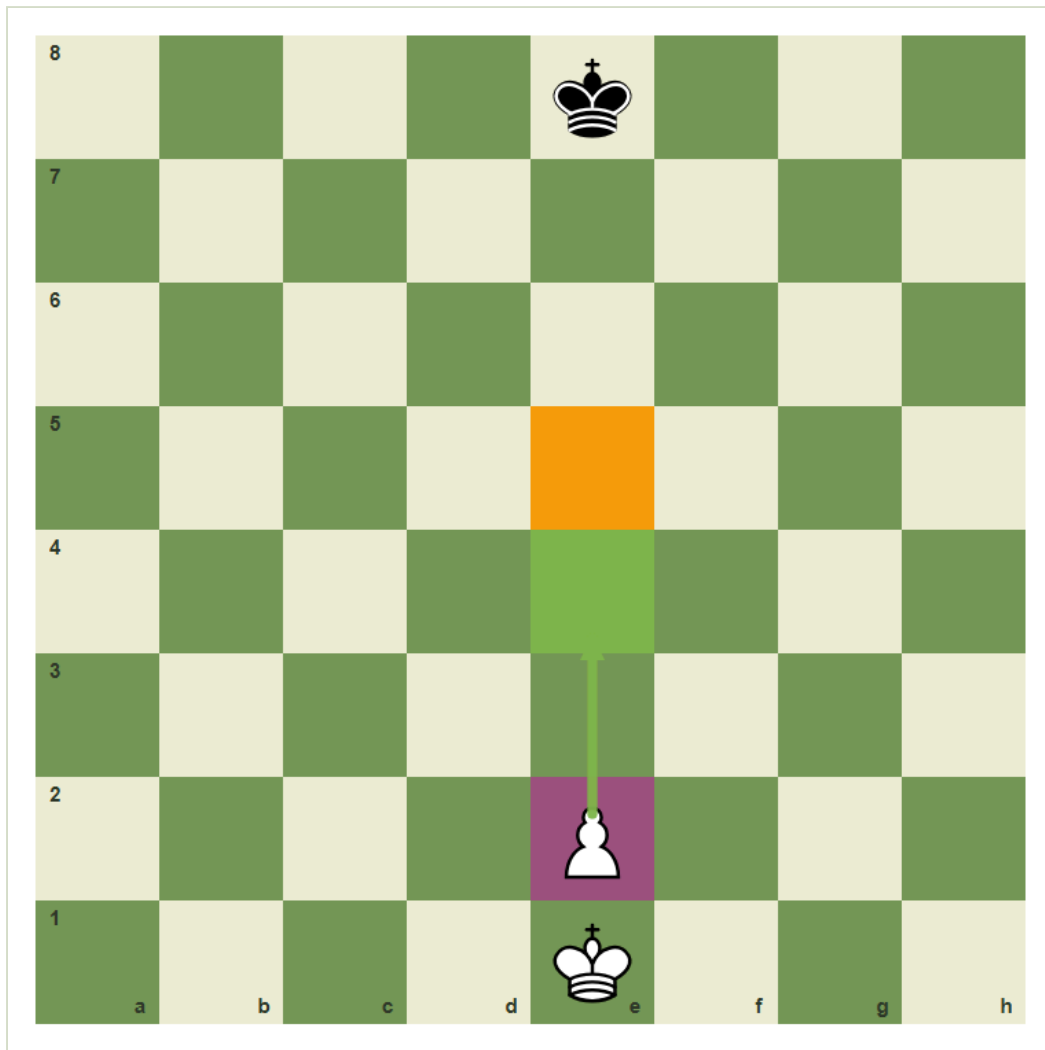

Play the highlighted move from **e2** to **e4**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Choosing Openings By Style Check 1

What should you do first in a position about **choosing openings by style**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Choosing Openings By Style Check 2

Which answer best matches the chapter habit for **choosing openings by style**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Choosing Openings By Style Check 3

What is the biggest danger if you ignore **choosing openings by style**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Model Games As Memory Anchors

Repertoire And Model Games | 2000-2300 | gold

Model Games As Memory Anchors converted into a repeatable Chess99 training habit.

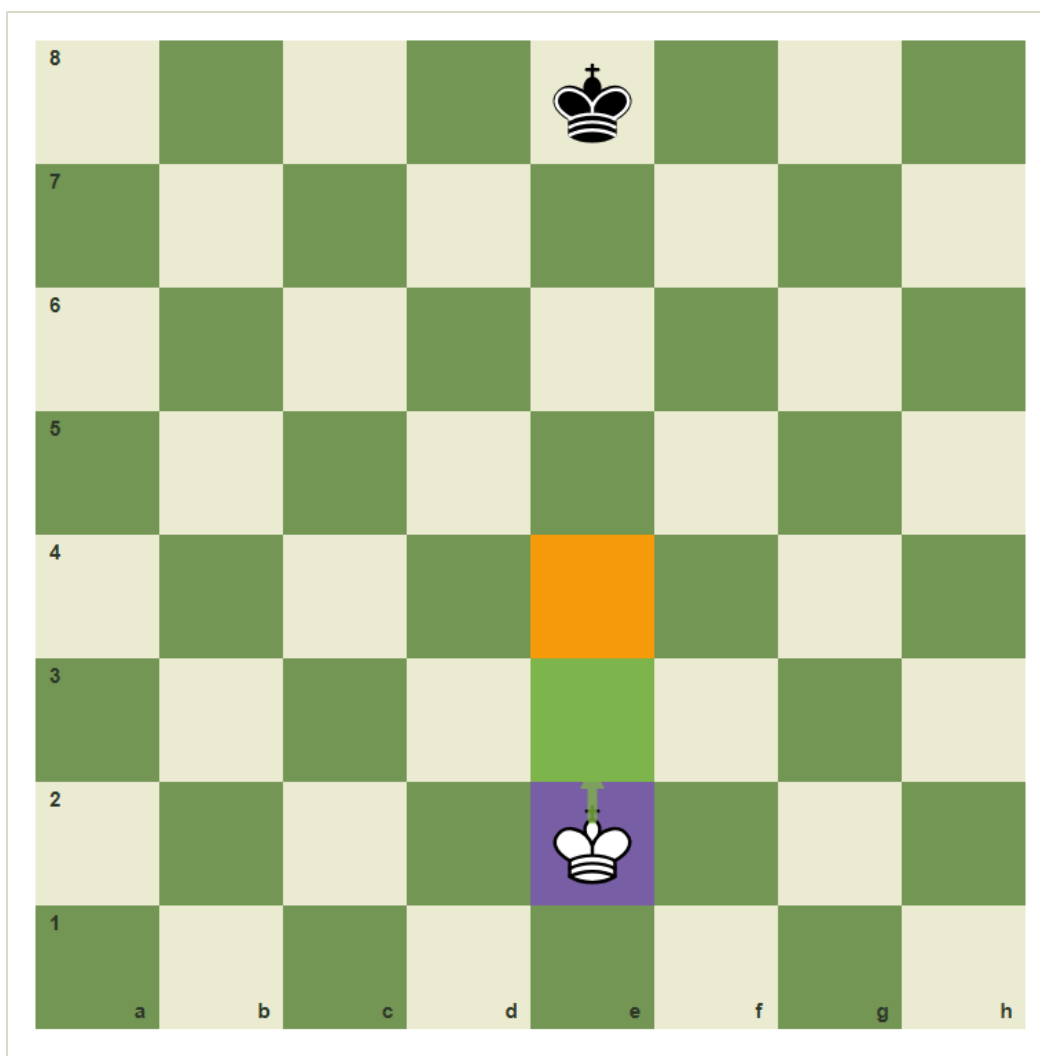

Learning objectives

- Recognize the visual signal for model games as memory anchors.
- Choose a move or plan that fits model games as memory anchors.
- Avoid the common beginner error connected with model games as memory anchors.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

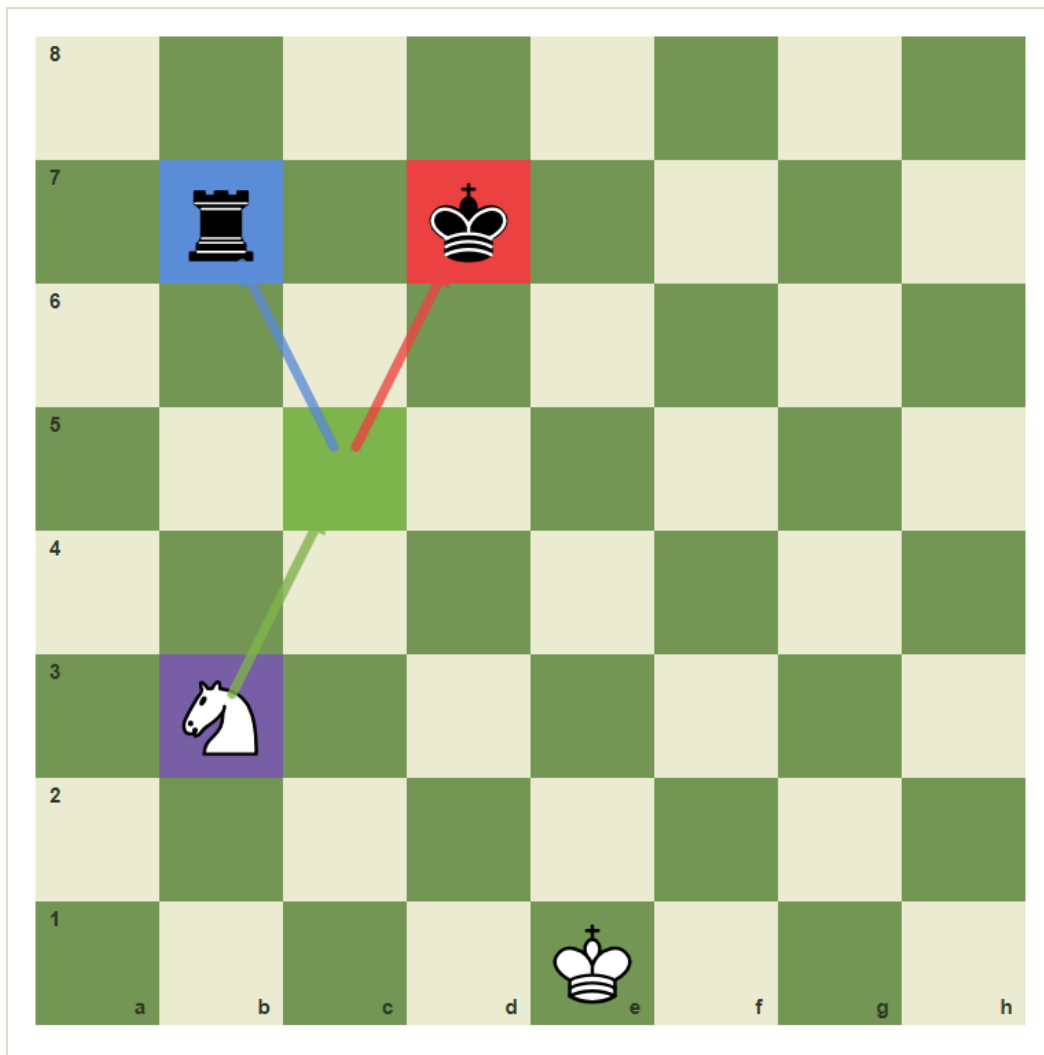

Model Games As Memory Anchors is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

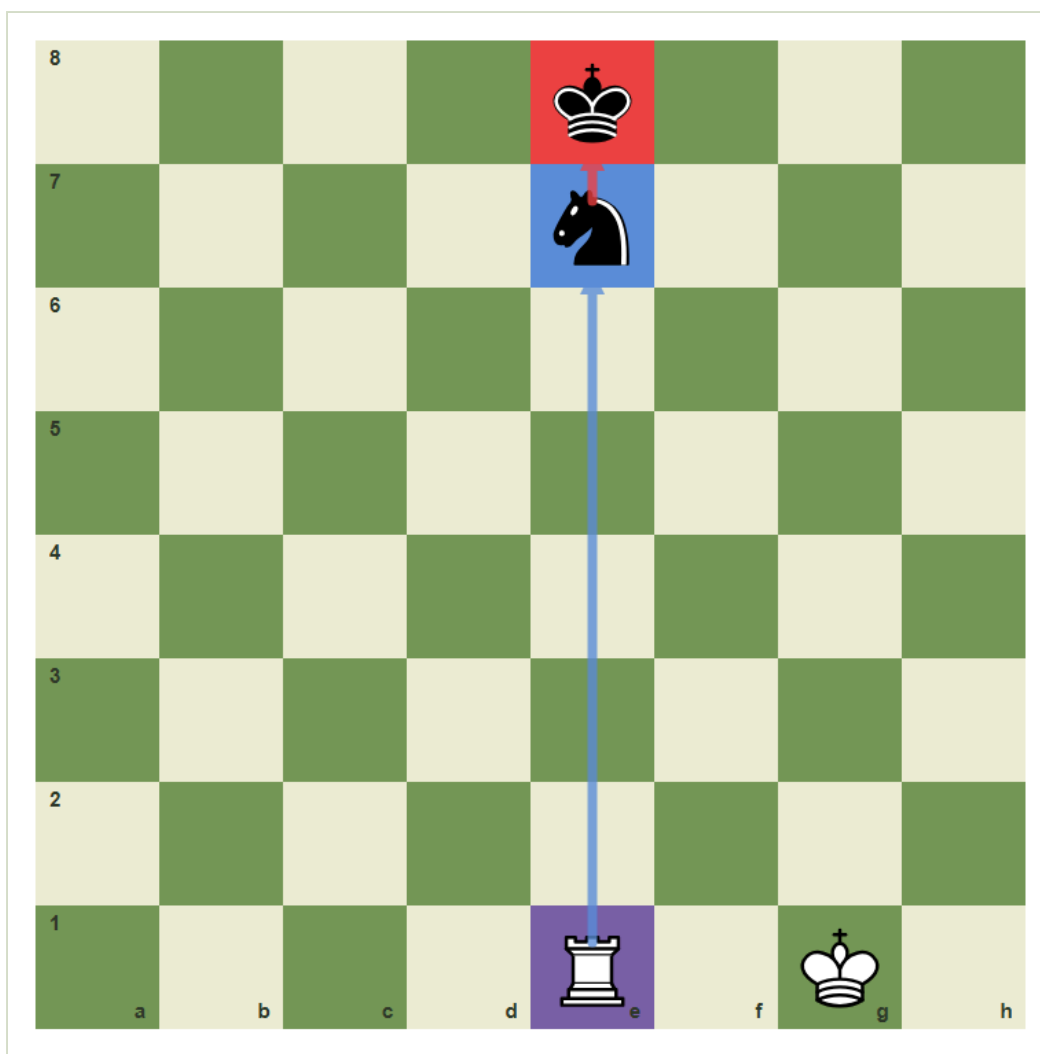

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Analysis And Decision

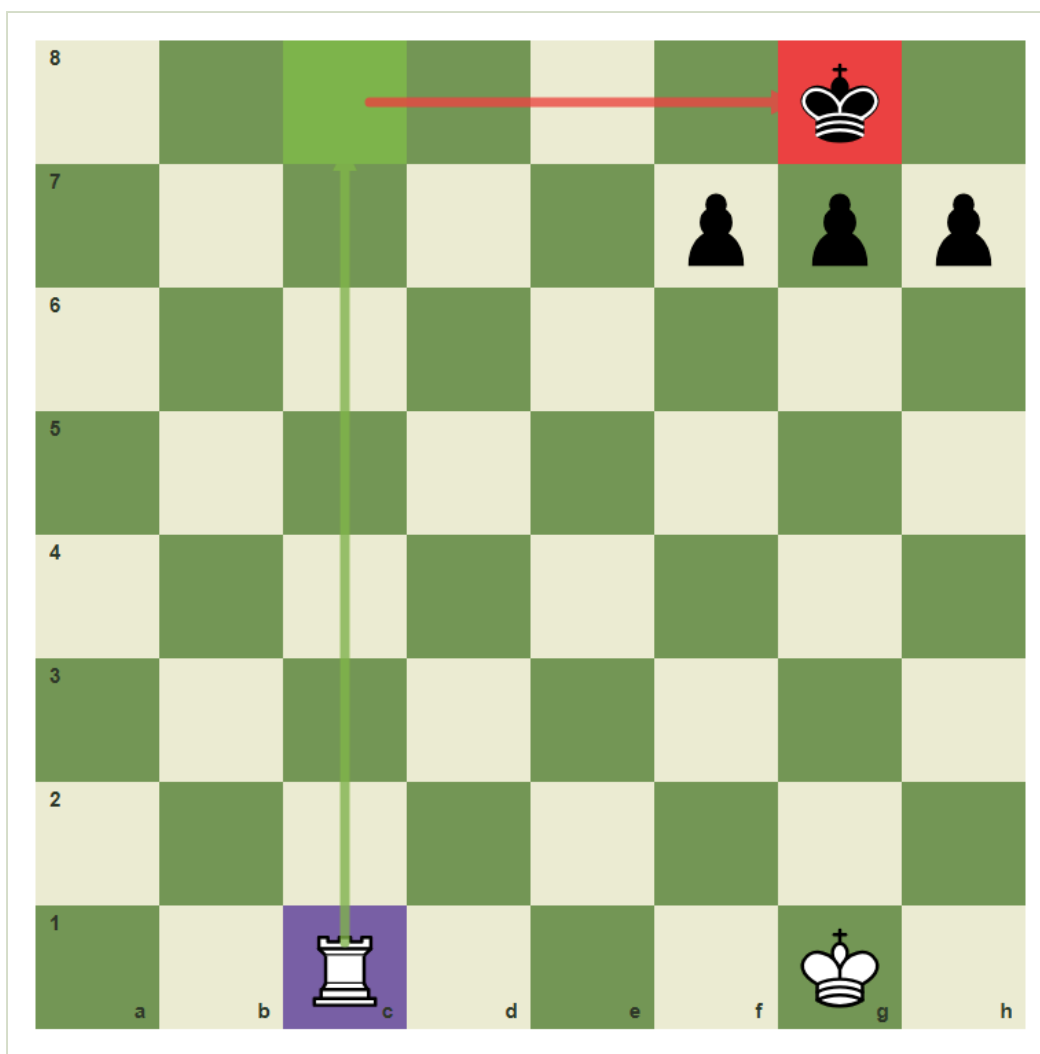

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

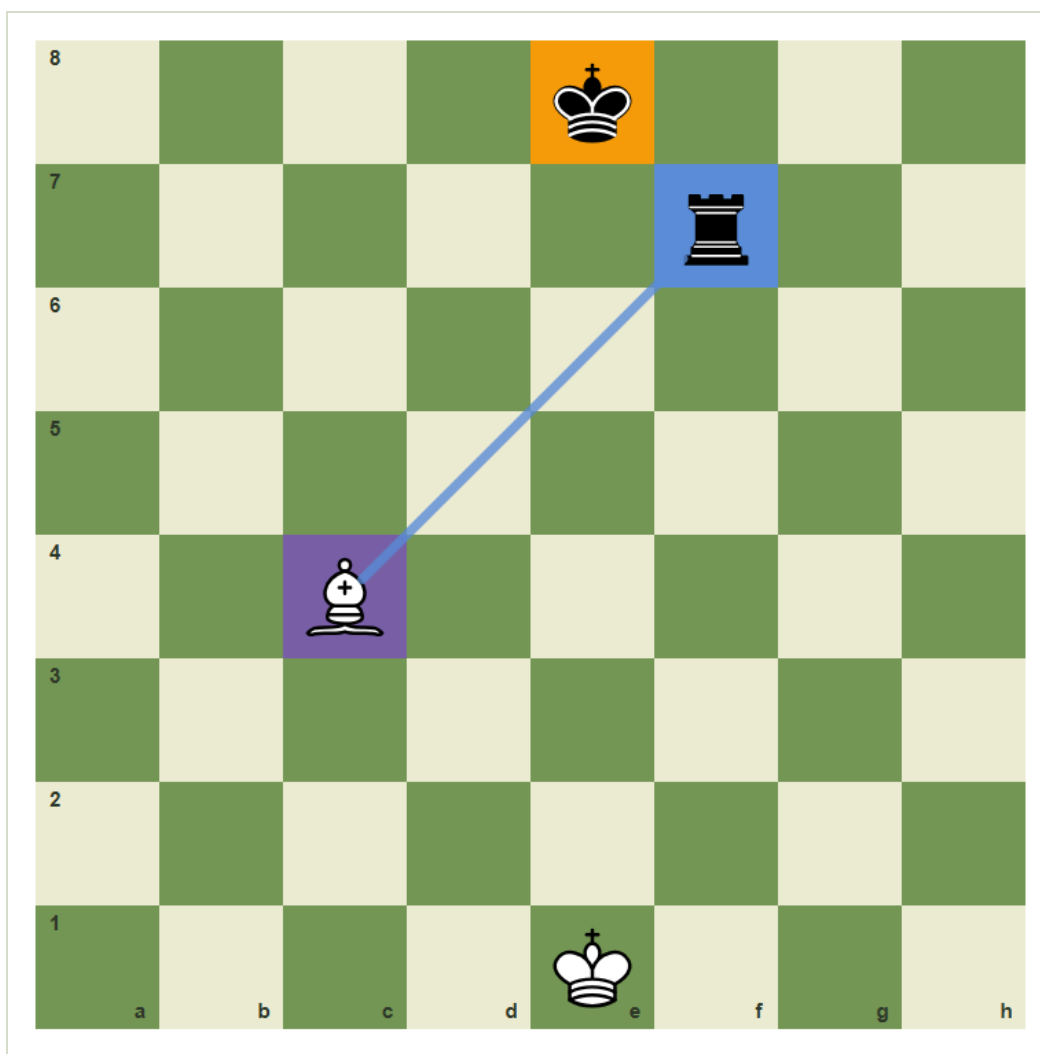

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

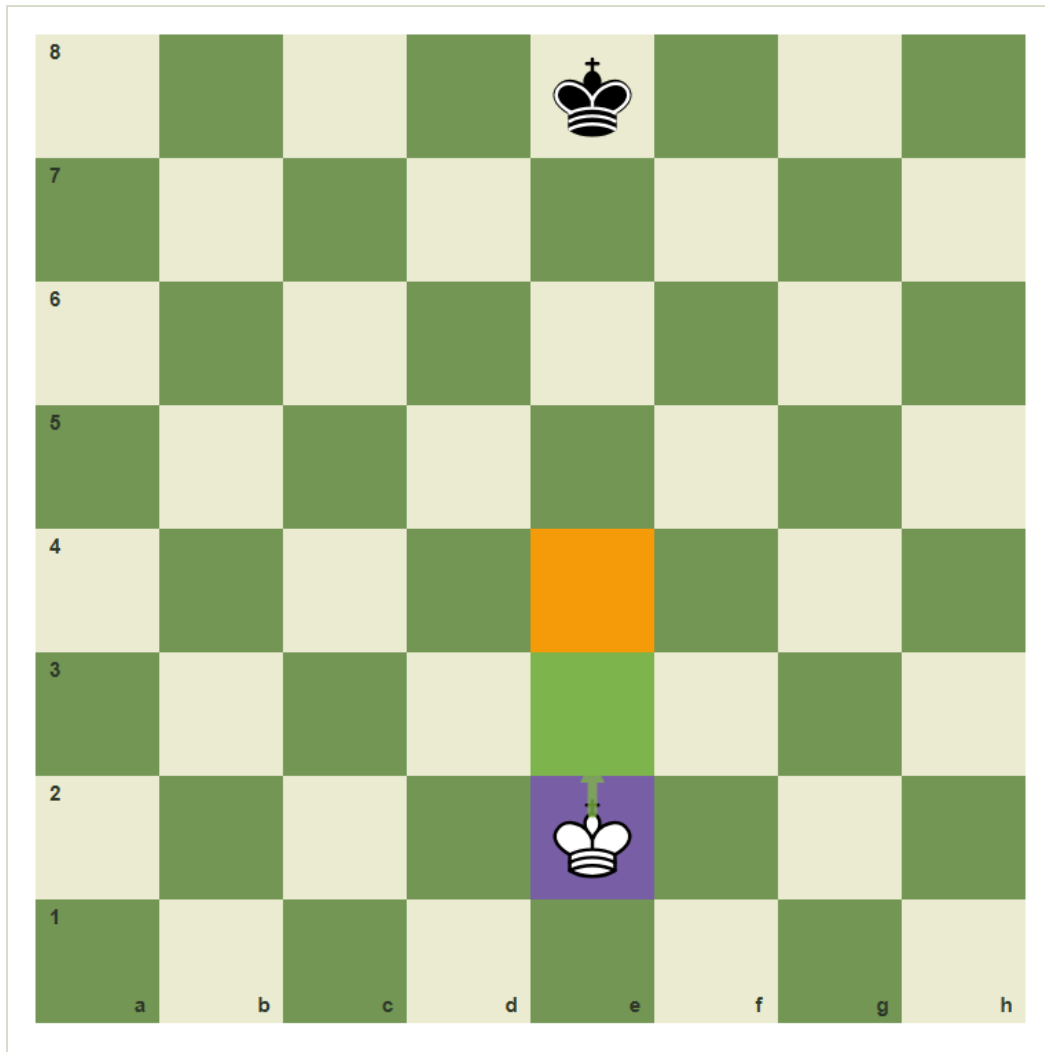

Training Diagram: review position

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

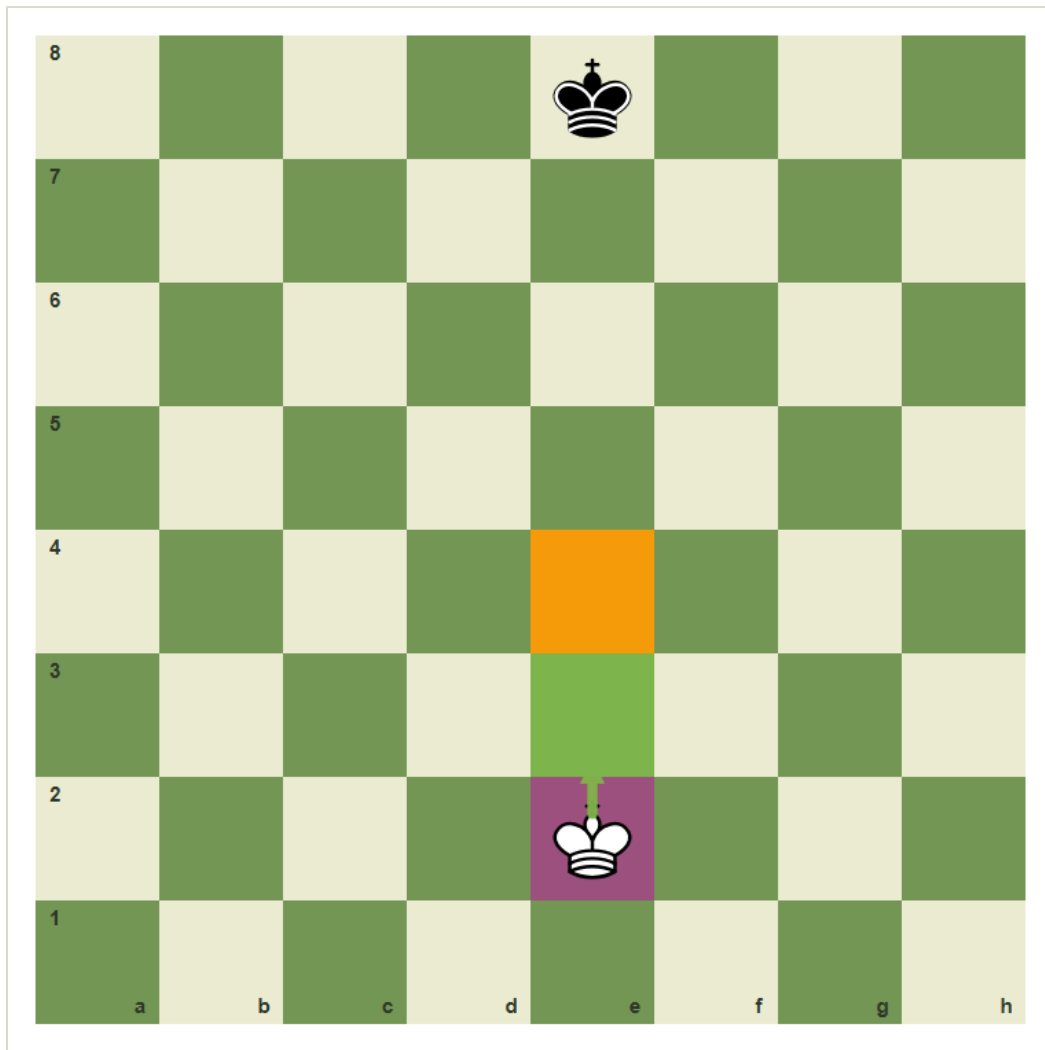

Play the highlighted move from **e2** to **e3**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Model Games As Memory Anchors Check 1

What should you do first in a position about **model games as memory anchors**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Model Games As Memory Anchors Check 2

Which answer best matches the chapter habit for **model games as memory anchors**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Model Games As Memory Anchors Check 3

What is the biggest danger if you ignore **model games as memory anchors**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Typical Pawn Breaks

Repertoire And Model Games | 2000-2300 | gold

Typical Pawn Breaks converted into a repeatable Chess99 training habit.

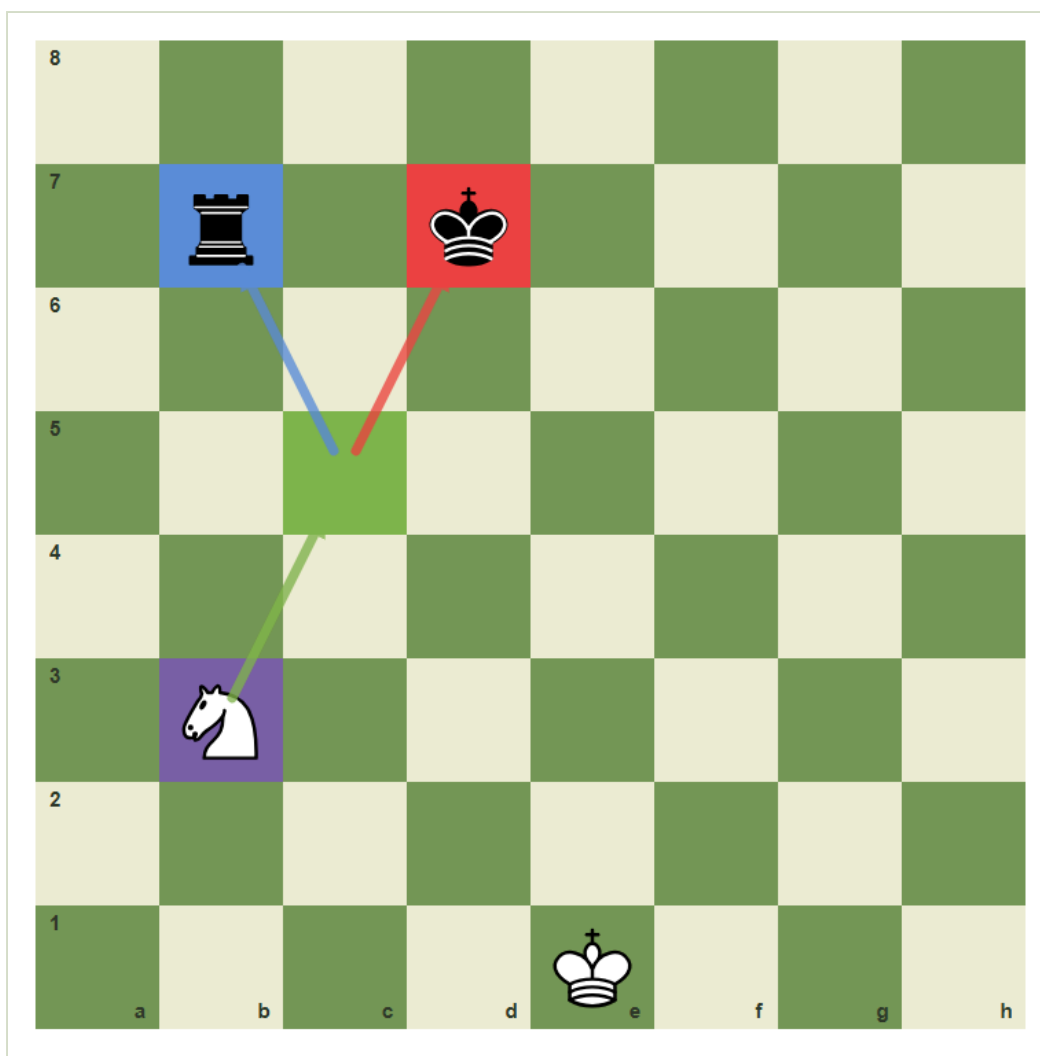

Learning objectives

- Recognize the visual signal for typical pawn breaks.
- Choose a move or plan that fits typical pawn breaks.
- Avoid the common beginner error connected with typical pawn breaks.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

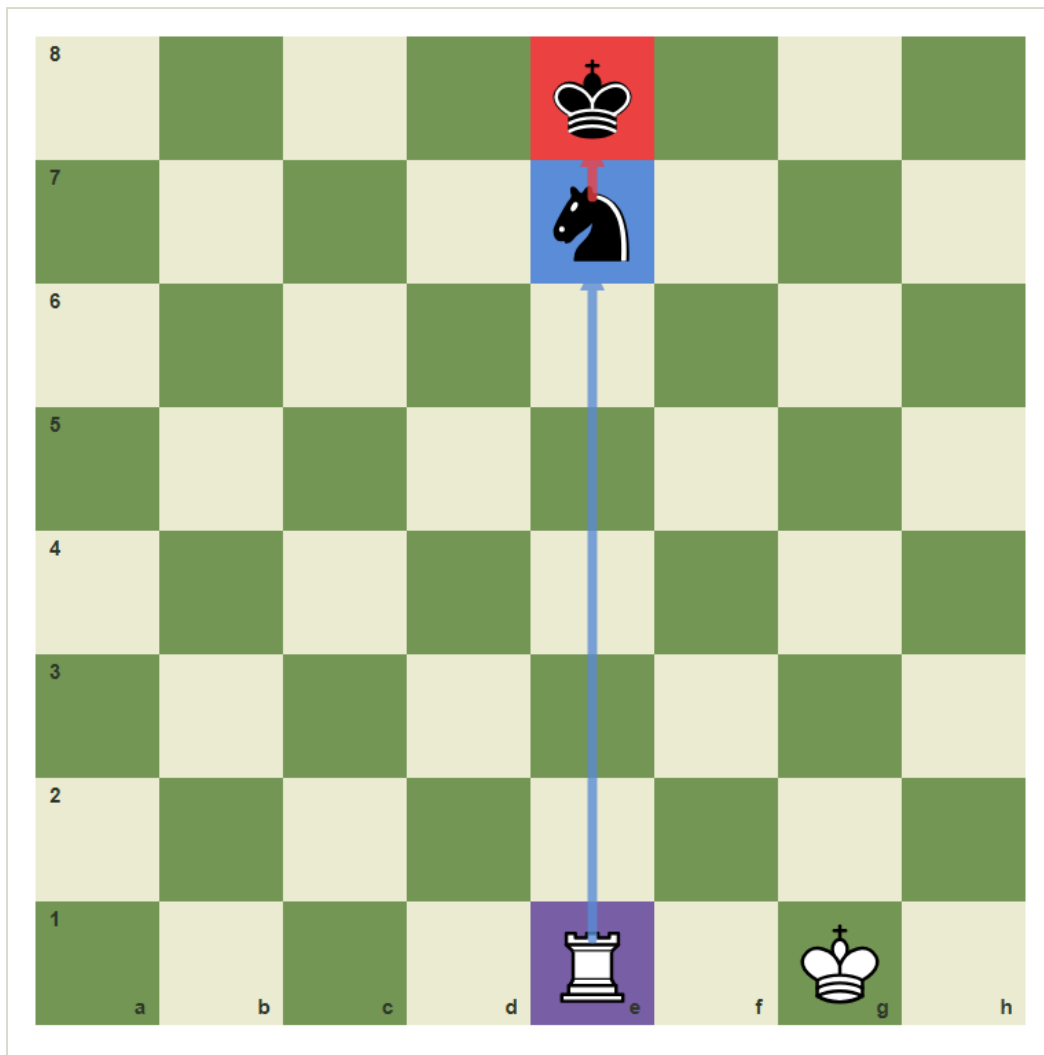

Typical Pawn Breaks is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.
