

CHESS99 BOOK 12 | ELO 2100-2500 | GOLD

Tournament Mastery And Self-Coaching

Preparation, annotation, mistake taxonomy, routines, and long-term training plans.

Contents

1. Pre-Game Preparation 28 min
2. Opponent-Style Preparation 28 min
3. Time Management 28 min
4. Decision Journals 28 min
5. Post-Game Annotation 28 min
6. Blunder Taxonomy 28 min
7. Opening Repair 28 min
8. Endgame Repair 28 min
9. Tournament Routines 28 min
10. Personal Training Plan 28 min

Pre-Game Preparation

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Pre-Game Preparation converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for pre-game preparation.
- Choose a move or plan that fits pre-game preparation.
- Avoid the common beginner error connected with pre-game preparation.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Pre-Game Preparation is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

A high-value target changes the whole position when it is undefended. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: review position

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **f3** to **d4**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Pre-Game Preparation Check 1

What should you do first in a position about **pre-game preparation**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Pre-Game Preparation Check 2

Which answer best matches the chapter habit for **pre-game preparation**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Pre-Game Preparation Check 3

What is the biggest danger if you ignore **pre-game preparation**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Opponent-Style Preparation

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Opponent-Style Preparation converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for opponent-style preparation.
- Choose a move or plan that fits opponent-style preparation.
- Avoid the common beginner error connected with opponent-style preparation.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Opponent-Style Preparation is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

King safety often beats a tempting pawn grab or one-move threat. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: review position

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e1** to **g1**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Opponent-Style Preparation Check 1

What should you do first in a position about **opponent-style preparation**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Opponent-Style Preparation Check 2

Which answer best matches the chapter habit for **opponent-style preparation**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Opponent-Style Preparation Check 3

What is the biggest danger if you ignore **opponent-style preparation**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Time Management

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Time Management converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for time management.
- Choose a move or plan that fits time management.
- Avoid the common beginner error connected with time management.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Time Management is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: review position

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **c4** to **f7**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Time Management Check 1

What should you do first in a position about **time management**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Time Management Check 2

Which answer best matches the chapter habit for **time management**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Time Management Check 3

What is the biggest danger if you ignore **time management**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Decision Journals

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Decision Journals converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for decision journals.
- Choose a move or plan that fits decision journals.
- Avoid the common beginner error connected with decision journals.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Decision Journals is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Open files are highways for rooks, especially when a king or target is exposed. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Training Diagram: review position

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **a1** to **a8**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Decision Journals Check 1

What should you do first in a position about **decision journals**?

- a. Name the key signal before choosing a move.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Decision Journals Check 2

Which answer best matches the chapter habit for **decision journals**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Decision Journals Check 3

What is the biggest danger if you ignore **decision journals**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Post-Game Annotation

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Post-Game Annotation converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for post-game annotation.
- Choose a move or plan that fits post-game annotation.
- Avoid the common beginner error connected with post-game annotation.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Post-Game Annotation is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

In pawn endings, one tempo can decide whether the pawn advances or stalls. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: review position

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e2** to **e4**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Post-Game Annotation Check 1

What should you do first in a position about **post-game annotation**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Post-Game Annotation Check 2

Which answer best matches the chapter habit for **post-game annotation**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Post-Game Annotation Check 3

What is the biggest danger if you ignore **post-game annotation**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Blunder Taxonomy

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Blunder Taxonomy converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for blunder taxonomy.
- Choose a move or plan that fits blunder taxonomy.
- Avoid the common beginner error connected with blunder taxonomy.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Blunder Taxonomy is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

Not every best move is a capture; sometimes the quiet improving move is the point. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Analysis And Decision

Use the diagram as a thinking board. Ask what is forcing, what is loose, and what changes after the move. Strong players do not only see a move; they see the reason the move works.

Training Diagram: comparison position

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: best practical choice

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: review position

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **e2** to **e3**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Blunder Taxonomy Check 1

What should you do first in a position about **blunder taxonomy**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Blunder Taxonomy Check 2

Which answer best matches the chapter habit for **blunder taxonomy**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Blunder Taxonomy Check 3

What is the biggest danger if you ignore **blunder taxonomy**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Opening Repair

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Opening Repair converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for opening repair.
- Choose a move or plan that fits opening repair.
- Avoid the common beginner error connected with opening repair.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Opening Repair is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The best square creates two problems at once: king danger and material pressure. Study the highlighted relationship before reading the move.

Opening Repair Check 2

Which answer best matches the chapter habit for **opening repair**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Opening Repair Check 3

What is the biggest danger if you ignore **opening repair**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Endgame Repair

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Endgame Repair converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for endgame repair.
- Choose a move or plan that fits endgame repair.
- Avoid the common beginner error connected with endgame repair.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Endgame Repair is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The target cannot move freely because the king behind it matters. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Endgame Repair Check 1

What should you do first in a position about **endgame repair**?

- a. Name the key signal before choosing a move.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Endgame Repair Check 2

Which answer best matches the chapter habit for **endgame repair**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Endgame Repair Check 3

What is the biggest danger if you ignore **endgame repair**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Tournament Routines

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Tournament Routines converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for tournament routines.
- Choose a move or plan that fits tournament routines.
- Avoid the common beginner error connected with tournament routines.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Tournament Routines is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

A rook reaches the back rank when the escape squares are boxed in. Study the highlighted relationship before reading the move.

Training Diagram: candidate move

Checks are forcing moves and should be examined before quieter ideas. Study the highlighted relationship before reading the move.

Try It: Find The Training Move

Play the highlighted move from **c1** to **c8**. Do it only after saying the idea in words.

The guided move turns the diagram idea into a playable habit.

Common Mistake: Missing The Diagram Signal

The common mistake is to move by habit and miss the chapter signal. The diagram marks the useful move and the important target so the error is visible before it happens.

The marked relationship is the reason the natural careless move fails.

Chapter Checkpoint

Tournament Routines Check 1

What should you do first in a position about **tournament routines**?

- Name the key signal before choosing a move.
- Move instantly because the first idea is usually enough.
- Ignore the diagram and choose by piece value only.

Tournament Routines Check 2

Which answer best matches the chapter habit for **tournament routines**?

- a. Compare candidate moves and reject the unsafe one.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Tournament Routines Check 3

What is the biggest danger if you ignore **tournament routines**?

- a. You may miss a tactic, plan, or defensive resource.
- b. Move instantly because the first idea is usually enough.
- c. Ignore the diagram and choose by piece value only.

Personal Training Plan

Tournament Mastery And Self-Coaching | 2100-2500 | gold

Personal Training Plan converted into a repeatable Chess99 training habit.

Learning objectives

- Recognize the visual signal for personal training plan.
- Choose a move or plan that fits personal training plan.
- Avoid the common beginner error connected with personal training plan.
- Pass a checkpoint without relying on guesswork.

Goal And Pattern

Personal Training Plan is not a memory trick. It is a way to organize the position. First name the signal, then compare candidate moves, then choose the move that improves your position without creating a new weakness.

Training Diagram: main pattern

The line to the target is clear, so the capture wins higher-value material. Study the highlighted relationship before reading the move.

Training Diagram: candidate move
